Bi-Office is synonymous with quality and experience. The brand belongs to Bi-silque, a Portuguese multinational company certified in innovation and dedicated to launch new products, approach new markets and discover new production processes to deliver to our clients something more than just the best visual communication products.

The brand has a wide variety of products and a dynamic team of Marketing and R & D dedicated each year to the launch of new products. Experts in visual communication aids, Bi-silque also has teams of sales, marketing and R & D dedicated to technological products, such as interactive whiteboards and tables.

Result of an experience of more than 35 years of internationalization, many clients and known brands rely on Bi-silque their category management, creating unique opportunities for partnership and growth. Together we engage in the creation of innovative solutions that blend design and functionality.

Within Bi-silque Group, our clients can find all kinds of presentation, teaching and planning items. The product range covers all types of boards, revolving boards, easels, conference products, multimedia and interactive solutions, paper pads and accessories.

Get to know our product range with the most recent novelty within the 2015 Bi-Office catalogue – AUGMENTED REALITY – and be aware of how our products can help people to communicate!

BI-OFFICE CATALOG WITH PRODUCTS AUGMENTED REALITY

The operation logic is very simple, just download our free App and point to the identification element with the Bi-Office's AR logo.

Augmented Reality (AR) is a technology that allows you to enable several digital contents on almost any element that surrounds us (objects, symbols, images, logos...), simply through a mobile device, giving us the possibility to "zoom in" the relationship between us and the reality. There are several advantages in using this technology, being the most evident the drastic reduction of the distance between the brands, their products/services and the customer. The application consists in software solutions which provide two or three-dimensional recognition services, as well as managing multimedia contents.

GETTING CLOSER TO YOU WITH 3D EXPERIENCE

DOWNLOAD THE BI-OFFICE APP

Bi-Office App is available for the following devices:

- . iPhone 3GS and above (recommended 4 or above);
- . iPad 2 and above (recommended 4 or above);
- . Android Phone 2.3 and above (recommended 4.1 or above);
- . Tablet Android 2.3 and above (recommended 4.1 or above);

Bi-Office App is available in the following markets:

- . Google Play;
- . Apple App Store.

FIND THE AUGMENTED REALITY ICON

Wherever you see the Bi-Office Augmented Reality icon you can activate the application and enjoy our selected products.

LIVE THE EXPERIENCE!

Explore the application and enjoy the interactive contents.

Bi-OFFICE

PERFECT SOLUTIONS FOR SPACES INSIDE THE OFFICE

In today's challenging business environment, offices are more than a place to work, they are a strategic business asset that reflect the company's values. Bi-Office understands that collaboration, creativity and flexibility are key in any office environment; making good and effective solutions to our customers is essential.

Striving towards innovation, we have brought you the best solutions for any of your office needs. Bi-Office products combine excellent design with the best functionality for any space in the office. With our products you will be able to create a vibrant work environment that will shorten communication links, improve cooperation and encourage engagement, all of which leading to improved business results.

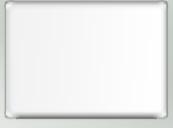

At Bi-Office we understand that sustainability is more than a just a buzzword among corporations, but has become smart business. We have attached our Bi-Office solutions with a sustainable office by pursuing the following activities throughout our production process:

- Elimination of toxic and unidentified chemicals
- Collection of combustible waste
- 99% of packaging is recyclable
- Incineration of approx. 250 tons of production waste material
- Energy self generated through waste equates to almost 750,000 Kwh per year

OFFICE SPACES

In the table below you may find our **top selection** products for 5 office areas: meeting rooms, executive areas, breakout areas, open plan areas and reception areas.

	MEETING ROOMS	EXECUTIVE AREAS	BREAKOUT AREAS	OPEN PLAN AREAS	RECEPTION AREAS
DESCRIPTION	A space used for interactive processes that supports different activities	Space that sets the tone of the company and leadership. The background of the image is a photograph of a modern skyscraper with a curved glass facade, situated in a park. In the foreground, there is a single tree on a small, landscaped island in a grassy field. The sky is clear and blue.

EARTH-IT COLLECTION

Bi-Office Earth-It products combine fine quality with a responsive approach on the environmental issues our planet is now facing. In our pursuit for excellence we match our office and communication solutions with the highest standards in sustainable development. Because this is a message worth passing on, we offer this presentation product brand as a choice for our most demanding clients.

EARTH-IT COLLECTION

PRESENTATIONS MADE NATURALLY

Answering to the contemporary need of finding sustainable options for the continued development of our consumer needs, Bi-Office products are offered in ecologically concerned formats. Our Earth-It presentation boards provide our customers with the best performance and professional quality.

ALUMINIUM

85% (Pre, post and recycled)

Bi-Office's aluminium frames follow the highest environmental standards. Metals can be recycled indefinitely without losing any of their properties. Recycling used aluminium saves up to 95% of the energy needed to make aluminium from its raw materials, making this an environmentally profitable process.

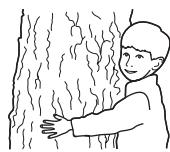

Recycling 1kg of aluminium saves 8kg of bauxite, 4kg of chemical products and 1/4 Kilowatts of electricity.

CERAMIC STEEL E³

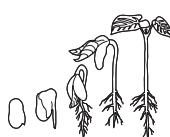

Bi-Office's environmental concerns made us search for ecological and user-friendly solutions for whiteboard surfaces. The e³ ceramic steel surface combines high efficiency and durability with the strictest and most demanding environmental regulations. Regarding the characteristics of sustainable materials, products and systems, this product is eco-friendly from the earlier production stages until it reaches the end consumer.

The e³ ceramic steel surface has a very low concentration of heavy metals and combines outstanding durability, superior visibility, exceptionally smooth writing/erasing and resistance to chemicals in one simple, environmentally concerned product.

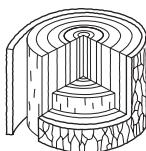

MDF

Bi-Office's MDF (Medium-Density-Fibreboard) frames are made from 28% (Post and pre) industrial waste and are almost fully recyclable. Apart from being an ideal option for recycling wood or paper, MDF also offers consistency in strength and size and has no tendency to split. The Environmental Impact of MDF has greatly improved over the years with low formaldehyde emissions, class EI (EN I20) or 4mg/lOOg.

PAPER

Offered in two solutions, made from recycled paper or from materials obtained in sustainable forests, our paper product lines reflect our environmental concerns. Fulfilling the most demanding EU ecological criteria, we guarantee our customers professional quality with almost zero environmental impact.

CORK

Portugal has the largest cork oak forest in the world and is by far the world's biggest manufacturer of cork products. To protect this treasure, Portugal was a pioneer in environmental legislation, the first agrarian laws dating from the early 13th century. The so-called Design Sustainability and Eco-Design have in products made of cork one of the most effective answers for environmental sustainability. The use of cork products is very significant from an ecological point of view. Being a renewable product, whenever it is used in consumer products the retention of carbon dioxide (CO₂) increases.

The cork bark is periodically (every 9 years on average) extracted from a cork oak tree which enables the tree to produce between 250% to 400% more cork than it would if the cork was not extracted, thus increasing CO₂ retention.

AGGLOMERATE/ CHIPBOARD

Writing white surface with 25% (Post and Pre) and fully recyclable. Made from material obtained in sustainable forests (PEFC), with low formaldehyde emissions, class EI (EN I20) or 4mg/lOOg.

earth-it collection

C2C certification is not just an environmental certification, it's a whole philosophy of life taken to a way to conduct business. Thinking about the future, but not the next generations, rather the next cycle of production.

Our products are generated from your waste.

We care for the selection of the safest products, the relationship with our workers, suppliers and our community. Doing good is our way. Will you join us?

Please visit the website for more information:
<http://www.c2ccertified.org>

Our boards are certified with the Eco label criteria. This certification promotes the reduction of the impact of your wooden board on the environment and human health throughout the lifecycle.

What does Eco label stands for?

- the use of more sustainable materials
- less use of hazardous substances
- reduced emissions of pollutants
- products with a proven durability (tested to EN I4434).

Please visit the website for more information:
<http://www.ecolabel.eu>

WRITING BOARDS

ANTI-MICROBIAL COLLECTION

This brand new range of hygienic products has been treated with world leading anti-microbial additive that actively kills 99% of microbes!

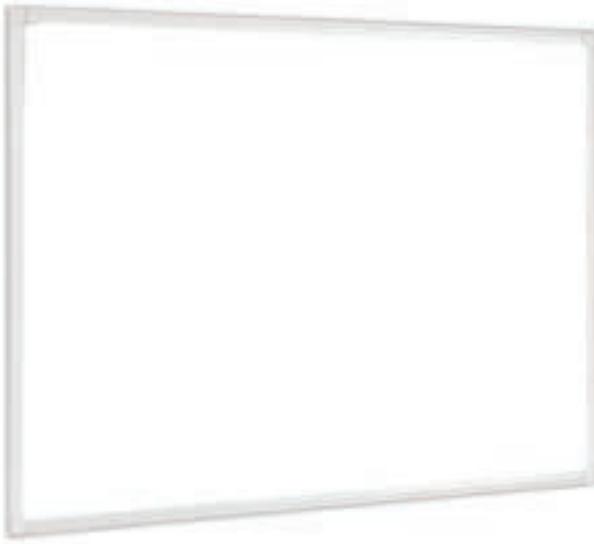

Public display and presentation products such as notice boards and whiteboards are by virtue used by many different people. Each person can leave bacteria, germs and microbes on the items they handle. The Biocote technology in this new Bi-Office range instantly starts to work and actively cleans the surface. 80% of all microbes are killed within 15 minutes and after 2 hours the elimination reaches up to 99%!

Products that possess this clean and hygienic attribute are ideal for public areas such as hospitals, surgeries, laboratories, dentists, food prep areas to name but a few. The special additive is always active and has no determinable life; it will keep cleaning day after day.

MAYA SERIES

Simple and straightforward, the products in this line are the most versatile boards in the market. Sober and well-designed, they come in a wide range of solutions and combinations. Maya Series Boards are extremely adaptable, durable and efficient.

PROJECTION & INTERACTIVITY

Multimedia and interactive content adds a richness and vibrancy to your presentation. The audience feels more involved, engaged and informed when they get closer to the subject. This increases audience focus on your presentation and enhances retention of information. This can be achieved with a simple projection screen, either mobile or wall fixed. But the very latest facilities are now investing in one of the latest Interactive Solutions, such as an Interactive Whiteboard or LCD screen, or even corporate bundle solutions.

PROJECTION SCREENS

Projection screen boards are suitable for meeting rooms or personal workspaces. We use in its manufacture a special matte enamel surface that enables you to easily write on and wipe off while you use it as a projection screen, making it extremely versatile.

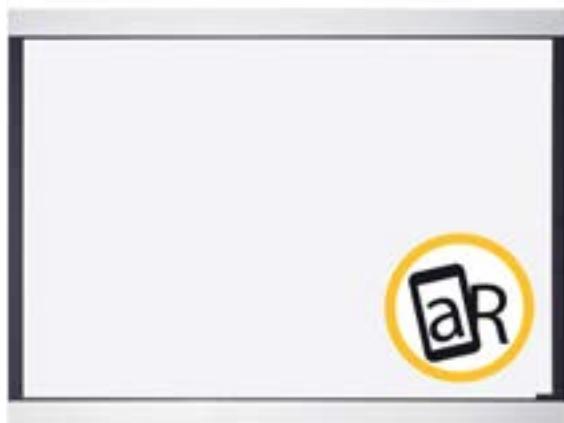

EXPRESSION PREMIUM BOARD

Dual purpose dry erase and projection boards

- Thanks to the special matt surface the Expression board is the ideal solution for any conference and training environment
- Ceramic matt surface for high performance use
- Black edging to frame and enhance projected image
- Contemporary clean design
- Anodised aluminium frame for extra elegance and style
- Available in a range of 3 convenient sizes

EXPRESSION PREMIUM BOARD

INTERACTIVE WHITEBOARDS

The Bi-Office interactive whiteboards are touch-sensitive and recognize the presence of a pen, finger or wand on the board surface. The ceramic steel surface is hard, resistant and durable, built for intensive daily use as a regular whiteboard.

The connection and user simplicity is the most important aspect of any Interactive Whiteboard and to that we have developed its Plug & Play connection to the three most common Operating Systems (Windows, Mac and Linux).

ERED + 78" · 96" MULTITOUCHE

3 in 1 solution: interactive board, projection screen and standard whiteboard

- Multi touch functionality allows richer use of specific contents
- Plug & Play
- Extremely easy to use
- High accuracy infrared technology
- Low power consumption
- 25 year warranty ceramic steel surface
- Highly scratch-resistant
- Aluminium frame

DISPLAY & SIGNAGE

The Bi-Office line of Display & Signage combines a direct approach to information display with the most up-to-date products and technology; adding performance, durability and a distinct contemporary design to commodities of already proven excellence. From executive to personal use, our solutions are extremely versatile and come in a wide range of surface and framing choices. Managing ideas, displaying important notices for individual or team work organization is made simple and straightforward by our durable and elegant boards.

HOW TO CHOOSE A NOTICE BOARD?

Bi-Office has developed a full range of display/ notice boards as an answer to the diversity of needs in today's demanding working environments.

FELT BOARDS Professional quality felt with a wide choice of smart colours. All our framing options are available.

CORK BOARDS Bi-Office uses the best natural fine grain Portuguese cork that, being self-healing, can last for a lifetime. We also have a Techcork line available, a special self-healing surface based on a fine blend between cork and rubber.

Aluminium and lined wood frames are available.

SOFTOUCH BOARDS If you are looking for a particular surface able to enhance how your office looks this is what you are looking for.
A sophisticated surface designed for modern working spaces.

COMBINATION BOARDS The best of two worlds in one board, offering a wide choice of combinations between surfaces and frames.

COMBONET BOARD Great performance notice board that works with magnets and push pins.
Choose between any of our aluminium frames.

SOUND PROOF DIVIDERS

Bi-Office Sound Proof Dividers are functional and lightweight elements that increase the acoustical comfort inside a room.

INFINITY SOUND PROOF DIVIDERS

These acoustical barriers were specially designed to improve the working conditions in professional offices

- Ideal solutions for wall, room and desk dividers
- Sound Absorbing Polyethylene Foam
- Triple Level Noise Absorption:
 - Initial Dissipation: Sound energy is lost as soon as it hits the foam membrane
 - Perforation: Engineered perforations allows for viscous energy loss
 - Cavity Absorption: Air cavities effectively trap sound vibrations inside the cell walls
- Sustainable: low-density PE (LDPE) material that can be recycled in LDPE recycling systems
